

Emergency Outage Alert – Friday September 23, 2022

It will be necessary for HWC to take a power outage of its Plaza Electric Substation beginning at 5:30 pm lasting for approximately 15 to 20 minutes. **This is necessary to remove a critical piece of equipment from service.** We received notification from our Vendor today that an oil sample taken during one of the normal maintenance cycles was showing severe deterioration and they issued a critical alert to remove this piece of equipment as soon as possible. The areas affected will be the Ludlow Road, Access Road, Washburn Street, Water Street, Lincoln St., Highland Ave., Prospect Street, Winter St., Mechanic St. Key Bank Building Lot, Market Commons, Charles St., River St., North St. from Maple Street to Heading North, The North Road Shopping Plaza and North St North of Interstate 95.

In addition to this outage HWC will need to take an outage Sunday from 1 pm to 5 pm to replace this piece of equipment. My apologies for the outage, but unfortunately this is an emergency situation and the equipment must be replaced.
